1. The first step in the process is to identify the problem or issue that needs to be addressed.

2. Once the problem is identified, the next step is to gather information and data related to the issue.

3. After gathering information, the next step is to analyze the data and identify the root cause of the problem.

4. Once the root cause is identified, the next step is to develop a plan of action to address the problem.

5. The final step in the process is to implement the plan and monitor the results to ensure the problem is resolved.

6. Once the problem is resolved, the next step is to evaluate the process and identify areas for improvement.

7. The final step in the process is to document the results and share the findings with the relevant stakeholders.
